Allergeneye Immunochromatography Buckwheat 61954 -Food reactivity data

Extraction and measurement have been conducted in accordance with the instruction manual of Allergeneye Immunochromatography.

- Judgement: Positive「+」 Negative「-」
- Remark*1: Although judgement lines may not appear due to prozone phenomenon, it has been judged as positive with the diluted samples.
- Remark*2: Test strips can be colored. In this case, please conduct the test with diluted samples as judgement cannot be made accurately.
- If the viscosity of samples is high, dilute the samples accordingly and perform the test.
- Result may differ depends on its varieties and production area.
