

RE: Petrifilm® Product Range- Hazard Classification
Valued Customer,

Petrifilm® products supplied by Neogen Corporation do not meet hazard classification criteria under the globally harmonized system for classification (GHS) and as such are exempt from Safety Datasheet (SDS) or Hazard Communication requirements globally. This article letter is being sent in lieu of a Safety Datasheet.

Non-hazardous articles are exempt from GHS classification as per UN Globally Harmonized System of Classification and Labelling of Chemicals, Revision 8, Section 1.3.2.1.1

Below you will find a non-exhaustive list of citations from various global regulatory bodies related to the classification of non-hazardous articles. This list supplementary in nature, as all individual country-specific regulations listed below are based on the UN GHS classification system.

United States

This product is exempt from hazard classification according to OSHA Hazard Communication Standard, 29 CFR 1910.1200

European Union

This material is not classified as hazardous according to Regulation (EC) No. 1272/2008, as amended, on classification, labelling, and packaging of substances and mixtures.

Australia

Petrifilm products meet the definition of article as defined by Safe Work Australia: Classifying hazardous Chemicals; National Guide (July 2020). Under WHS regulations, articles are included as in-scope, however as specified in the National guide, Petrifilm plates do not contain a hazardous substance or mixture which may be released during indicated use, handling, or storage.

Japan

The product is considered an article pursuant to JIS Z 7252:2019 and is exempt from hazard classification and labelling.

China

According to Article 4 of the "Hazardous Chemicals Labeling and General Knowledge Rules", this product is exempt from GHS classification.

Colombia

According to Decreto 1496 de 2018 the product is not a chemical and is exempt from SDS and labelling requirements under the UN GHS classification system.

Chile

According to Decreto 57 APRUEBA REGLAMENTO DE CLASIFICACIÓN, ETIQUETADO Y NOTIFICACIÓN DE SUSTANCIAS QUÍMICAS Y MEZCLAS PELIGROSAS, the product is not a chemical and is exempt from SDS and labelling requirements under the UN GHS Classification System.

Article Letter Rev. 2
Revised: October 10th, 2024
Replaces: Rev 1

According to the NORMA Oficial Mexicana NOM-018-STPS-2015, Sistema armonizado para la identificación y comunicación de peligros y riesgos por sustancias químicas peligrosas en los centros de trabajo, the product is not a chemical and is exempt from SDS and labelling requirements under the UN GHS classification system.

Petrifilm® Product composition: voluntary disclosure

Neogen Petrifilm products are complex articles comprised, in general, of the following individual component layers.

Component	CASRN	Weight %
Top Film (Thermoplastic)	N/A*	10 – 25%
Solid, selective Growth Media Matrix**	N/A*	5 – 25%
Bottom Film (Paper or Thermoplastic)	N/A*	20 – 60%
Tape	N/A*	1 – 5%
Thermoplastic foam	N/A*	0 – 50%

**individual component layers are finished articles and are not intended to be separated or released to the environment or user in a hazardous nature when used as defined in the product instructions for use.*

***Some Petrifilm products contain animal-derived ingredients in the growth media Matrix. For more information regarding the origin of animal-derived materials in specific Petrifilm® products, please contact Neogen.*

The above information is believed to be correct but does not purport to be all inclusive and shall be used only as a guide. Neogen Corporation shall not be held liable for any damage resulting from handling or from contact with the subject products.

If there are any further questions, please contact your Neogen Corporation Representative or email SDS@neogen.com.

Sincerely,

Kyle P. Erickson
